

Nevada State Board of Medical Examiners

Press Release – September 15, 2004

NEVADA STATE BOARD OF MEDICAL EXAMINERS GRANTS APPLICATIONS FOR LICENSURE OF PHYSICIANS, PHYSICIAN ASSISTANT AND PRACTITIONER OF RESPIRATORY CARE

At its quarterly meeting on September 10 and 11, 2004, the Nevada State Board of Medical Examiners ratified licensure of 246 physicians, 15 physician assistants, and 40 practitioners of respiratory care, and interviewed 19 applicants who were requested to personally appear.

Of the 19 applicants who personally appeared, the Board granted unrestricted licenses to 15 physicians, 1 physician assistant and 1 practitioner of respiratory care, and restricted licenses to 2 physicians to enter residency training at the University of Nevada Medical School residency program in psychiatry.

Since January 1, 2004, the Board has granted 345 physician licenses administratively, that is, to applicants who met all of the statutory and regulatory requirements for licensure. This does not include the 17 applicants who appeared before the Board at the September meeting.
